

Vintage Kits Expansion Pack

a sound enhancing expansion pack for the Roland TD-12 Drum Module

Owner's Manual

End User License Agreement (EULA)

This is a legal agreement ("this Agreement") between you and V Expressions LTD., ("V Expressions LTD."). This Agreement pertains to your use of the V Expressions LTD. expansion programming, documentation and updates which are provided to you by V Expressions LTD (collectively, the "Product"). By purchasing a V Expressions LTD. Product, you are consenting to the terms of this Agreement.

This Agreement grants you a personal, exclusive, non-transferable, non-sub licensable right to use one copy of the V Expressions LTD. Product for your own personal use on a single computer and/or compatible drum module. V Expressions LTD. reserves all rights in the Product not expressly granted herein, including ownership and proprietary rights.

This software may not, in whole or in any part, be copied, reproduced, resold, transmitted, translated (into any language, natural or computer), reduced to any electronic medium or machine readable format, or by any other form or means without prior consent, in writing, from V Expressions LTD.

License Restrictions: You may not reproduce or distribute the Product. You may not copy the Product to any media, server or location for reproduction or distribution. You may not reverse engineer, de-compile or disassemble the Product or otherwise attempt to derive the source code for the Product, or without limitation, redistribute, sublicense, or otherwise transfer rights in the Product. This Product may not be rented, lent or leased. The restrictions contained herein apply equally to any updates that may be provided to you by V Expressions LTD..

Disclaimer of Warranties: Products provided by V Expressions LTD. are provided "As Is". V Expressions LTD. makes no warranty to you or any other entity.

Limitation of Liability: In no event shall V Expressions LTD. or its employees and/or partners be liable to you or any third party for any costs or damages arising directly or indirectly from the use of the V Expressions LTD. Product, including without limitation any actual, incidental, consequential, exemplary, punitive, reliance or special damages, or for any loss of revenue, profits, use, data, goodwill or business opportunities of any kind or nature whatsoever, arising in any manner from any cause or action or claim relating to this Agreement and to the Product provided by V Expressions LTD..

Indemnification: You agree to indemnify and hold V Expressions LTD., its employees and partners harmless from and against any and all damages, losses, costs including attorney fees and expenses resulting from any violation by you of this Agreement or asserted by any third party due to or arising out of your use of or conduct with respect to the Product.

Jurisdiction and Other Provisions: This Agreement and the relationship between V Expressions LTD. and you shall be governed in accordance with the laws of the State of Florida. Any dispute between you and V Expressions LTD. regarding this Agreement will be subject to the exclusive jurisdiction of the state and federal courts in the State of Florida.

You acknowledge that you have read this Agreement and understand it and that, by purchasing and/or using the product, you agree to be bound by its terms and conditions.

V Expressions LTD. products are the Intellectual Property of V Expressions LTD., its employees and/or partners. Violators of Intellectual Property rights will be prosecuted.

Introduction

Thank you for purchasing V Expressions LTD's **Vintage Kits Expansion Pack!**

Vintage Kits Expansion Pack consists of **40 brand new simulated drum kits** modeled for the Roland TD-20 drum module. What you will find in this new expansion pack are **kits modeled to reflect famous and highly sought after 60's & 70's vintage brand name setups** - matched as closely as the TD-20 drum module can achieve.

New features exclusively available from V Expressions are implemented into your exciting new expansion pack! Some of these new features include:

- COSM features previously hidden inside your module!
- Improved TD-20 to TD-12 conversion accuracy!
- Mic Position (all drums and cymbals)
- Beater Type (bass drum)
- Sizzle Type (chain cymbal)
- Level of Snare Buzz (toms)
- and many more!

It is important to note that while these features are now implemented into the V Expressions LTD TD-12 conversions, they cannot be adjusted without loss of the feature due to Roland's internal interface.

This expansion pack is a collection of **kits that can be used in live and recording situations** by hobbyists, weekend warriors and professionals alike. Professional gigging and recording v-drummers can expand their library of custom kits to accommodate many musical genres, eras and types of drums. This expansion is **fully customizable** allowing the user to continue adjusting the kits, triggers and calibrations to best match his or her playing style.

NEW! What this expansion pack IS...

The **Vintage Kits** are based on classic and vintage kit setups from the **60's & 70's**. This expansion has been **designed on the Master Picks platform to achieve maximum flexibility in multiple situations and environments**. The design of this expansion pack **allows v-drummers full access to ambience and effects with complete output control in live and studio environments**. The accompanying mini-tutorials will guide and help v-drummer choose the best setup, on-board effects and production choices for their needs.

Although general ambience effects have been added to all kits to produce a "live - in the room" sound, these settings can easily be turned off and/or adjusted up or down by the drummer if a different tonal environment is desired.

NEW! What this expansion pack is NOT...

These kits are **not meant to sound like studio produced kits heard on albums, tapes or CD's**, but **are engineered to simulate what the raw kit would sound like isolated on stage or in the studio with general clean, light mixing**. This design results in authentic sounding kits ready for continued mixing, post production and output to recording and live performance consoles.

Vintage Kits Tips & Tricks

The **Vintage Kits Expansion Pack** has been designed with total flexibility in mind. Please set your group faders to 75% before loading your backup or individual kits as this will yield the best volume results. These kits are designed to sound “live & in the room” with light clean mixing. Ambience effects can be turned off, up or down based on each individual’s desire.

Thank you once again for purchasing the **Vintage Kits Expansion Pack** from V Expressions LTD. We hope you enjoy it!

Vintage Kits Recording/Output Mini-Tutorials

A word about ambience effects...

Ambience effects have been added to produce a live, in the room sound. The kits are designed to sound as though they are isolated in a lively studio booth. If you desire warmer, raw sounds to send through Master Outs, simply adjust the ambience and/or effect overall volume to your desired level. Turning the ambience effect off completely will send a dry mix through the Master Outs. Remember, the dry1-8 outs will always send dry individual signals.

Setup A: “General Recording and Output for Live Performance”

The generic setup is intended for those individuals who would like to provide dry signals for post production via the recording or live console. The Master Outs can be sent to the engineer in parallel with the dry outs as a guide for your desired sound. The engineer may choose to mix the dry signals with the Master Mix for a warm and full mix. Alternatively, ambience and effects can be turned off to provide your engineer with a “spare” mix track for simulating post-mix ambience or room mics.

Setup B: “Advanced Recording and Live Performance Techniques”

The “New York Compression Trick” refers to a technique used by professional recording studio engineers for the last twenty years. The result is a very full, warm and explosive drum kit. The secret to this technique is simple and can be easily achieved by the TD-12 module and your outboard gear.

Send the Master Outs as an overall mix. This mix can be further produced at the recording or live console to reach the desired sound. (it is advisable that you get the best final mix possible from the module) If a desired mix cannot be achieved, the dries will have to be bussed by the engineer to duplicate tracks. After light, continued production is finalized at the console, slowly bring original snare, toms and/or bass tracks up behind the mix until the raw attack warms the track to the desired mix.

Alternatively, some refer to the “New York Compression Trick” as “Parallel Compressions”. Effectively, this means you would do the opposite by mixing in “low level” or “heavy” compression passed tracks behind the produced, rather than raw, tracks.

In conclusion, this technique can really bring new life to v-drums! Try a few different things and watch your new kits explode with life!

Setup Conclusions:

These are only a couple of tricks to achieving incredible sounds with your TD-12 and **V Expressions LTD** expansion packs. Never be afraid to experiment!

Vintage Kits Expansion Pack Kit Listing

Number	Modeled to sound like...
1.	1960's Warm Gretch
2.	1960's Tight Medium Gretch
3.	1970's Round Low Gretch
4.	1960's Dead Ludwig
5.	1960's Round Low Ludwig
6.	1960's Bright High Ludwig
7.	1960's Dirty Ludwig
8.	1960's Bright Low Ludwig
9.	1960's Round Medium Ludwig
10.	1960's Loose Ludwig
11.	1960's Dead Ludwig
12.	1960's Boomy Ludwig
13.	1960's Trashy Ludwig
14.	1960's Bright High Ludwig
15.	1960's Trashy Ludwig
16.	1970's Round Low Ludwig
17.	1970's Dead Ludwig
18.	1970's Round Low Ludwig
19.	1970's Steel Snare Ludwig
20.	1970's Round High Ludwig
21.	1970's Loose Pearl
22.	1970's Round Low Pearl
23.	1970's Boomy Low Pearl
24.	1970's Boomy Medium Pearl
25.	1960's Tight Medium Premier
26.	1970's Loose Premier
27.	1970's Tight Concert Premier
28.	1970's Tight Clear Premier
29.	1960's Boomy Radio Kings
30.	1960's Round Low Radio Kings
31.	1960's Bright Radio Kings
32.	1960's Dead Slingerlands
33.	1960's Bright Slingerlands
34.	1970's Ringy Sonors
35.	1960's Ringy Tama
36.	1970's Round Low Tama
37.	1970's Trashy Tama
38.	1970's Round Low Tama
39.	1970's Ringy Yamaha
40.	1970's Round Yamaha
41-50	User Kits

*** Some kits may have similar names but are different versions.*

*** A few kits will resemble similar kits on Master Picks 1 & 2, but with slight modifications.*

V Expressions Limited: TD-12 Expansion Pack Instructions

READ ALL OF THE FOLLOWING BEFORE CONTINUING!

All user kits in your TD-12 (flash memory) **will be erased during a load of any backup file**. The factory reset information is not disturbed and the original version of the TD-12 can be reset at any time to return to your default purchased starting point.

We highly recommend backing up your current TD-12 memory to save any personal previous changes before loading any expansion packs from V Expressions LTD.

Please take a moment to read all of our procedures below before attempting them.

If you have questions before attempting any of the procedures below, please refer to your TD-12 owner's manual or email V Expressions LTD from our website at www.vexpressionsltd.com.

Section I: Saving Data to an external MIDI Device (Bulk Dump)

Step 1: Connect the TD-12's MIDI OUT via MIDI cable to the MIDI IN connector of the external sequencer or computer.

Step 2: Press [SETUP]. The "SETUP" screen appears.

Step 3: Press [F1 (MIDI)] - [F5 (BULK)]. The "MIDI BULK DUMP" screen appears.

Step 4: Use [+/-] or [VALUE] to select "ALL" content to be sent.

Step 5: Start the recording process of the external sequencer.

Step 6: Press [F5 (EXECUTE)] to begin sending the data. *To cancel, press [F5 (STOP)].*

Note: Be sure to use an external MIDI sequencer that is capable of recording System Exclusive messages. We suggest Midi-Ox. (<http://www.midiox.com/>)

Section II: Loading Data from an external MIDI Device (Bulk Load)

Note: All the TD-12's current user data is overwritten. Make sure you have made a backup. The factory reset information will not be disturbed.

Step 1: Connect the TD-12's MIDI IN via MIDI cable to the MIDI OUT connector of the external sequencer or computer.

Step 2: Press "PLAY" on the external sequencer to load the data to the TD-12.

Note: We suggest...
